Subject FW: Good Sam State Legislative Resolution

See the message below.

This is the type of legislation that Carol Russell with EPA has been working on for quite some time as I recall. Without knowing all the details, I believe this would be very beneficial for TU and other groups by allowing restoration work to be done without some of the potential liabilities that presently exist. It may be worth looking into and developing a position in support if it looks agreeable.

Ted

some form
in the

For those of you who may not know, State Representative Andrew and State Senator Ken Chlouber (the lead sponsors) have joint resolution urging Congress to address the issues associated abandon mine cleanups and safety through a Good Sam permit and of funding. That resolution is HJR 04-1055. If you support this resolution, feel free to let these state Legislators (and others State General Assembly) know of your views.

Thanks.
